- 1b a Foo is related to no more than one Bar / a Bar is related to zero or more Foes /
a Baz is related to one or more Bars and at least one Foo
a Bar is related to at least one Baz / a Foo is related to exactly one Baz

2

I know the format is a little different from the ones in the class, but I can't get draw.io to recreate the excel type of table prototype and Visio is strictly for the Windows OS.
I think this format still conveys the same information, albeit vertically as opposed to horizontally.
